

PREPARED FOR (CLIENT)

Valued Enterprise Client
Automated Inbound & Outbound Calling Pipeline

PREPARED BY (ENGINEERING TEAM)

AI Voice & Cloud Engineering Solutions
Full-Stack Voice AI, Telephony & DevOps Architecture

COMMERCIAL SUMMARY

Turnkey production setup including custom programming, prompt engineering, Plivo telephony bridge, STT/TTS engine, and pre-funded cloud infrastructure.

TOTAL COMMERCIAL INVESTMENT

₹35,000

All-Inclusive (Dev ₹25K + Infra/Telephony ₹10K)

1 CORE DEVELOPMENT & CUSTOM ENGINEERING

DEVELOPMENT: ₹25,000

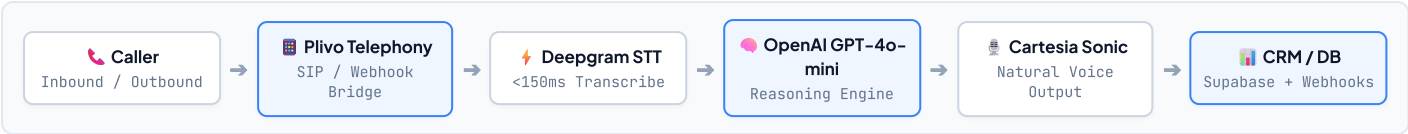

SCOPE & DELIVERABLE	TECHNICAL DESCRIPTION & IMPLEMENTATION DETAILS	AMOUNT (INR)
Real-Time Voice Pipeline Engine Sub-600ms latency architecture	Full bi-directional WebSocket streaming engine connecting telephony audio streams with live transcription, intelligence reasoning, and voice generation. Includes smart interruption (barge-in) and human-like turn-taking.	₹8,000
Custom Prompt & Persona Engineering Domain logic & conversational guardrails	Crafting specialized conversational prompt scripts, persona tone matching, objection handling, structured Q&A, entity extraction (names, emails, dates), and strict hallucination guardrails.	₹4,500
Telephony & Webhook Bridge Plivo / Twilio integration	Configuring automated outbound campaign dialers, inbound call routing, call answer/hangup hooks, DTMF keypad support, and live call transfer to human agents.	₹4,500
Lead Database & CRM Integration PostgreSQL / Supabase + Webhooks	Automated real-time logging of caller numbers, duration, audio recordings, timestamped transcripts, AI sentiment classification, and instant webhook sync to Google Sheets / CRM.	₹4,000
Production Cloud Deployment & DevOps Docker, Nginx & 24/7 PM2 monitoring	Containerizing application with Docker, configuring Nginx reverse proxy with SSL encryption, setup auto-healing daemon processes, and health check monitoring.	₹2,500
Testing, QA & Voice Tuning 50+ automated & manual test calls	Noise cancellation calibration, Indian accent speech recognition testing, latency minimization, and failover recovery testing before final handover.	₹1,500
TOTAL ENGINEERING & CUSTOM DEVELOPMENT INVESTMENT		₹25,000

2 PRODUCTION INFRASTRUCTURE, TELEPHONY & API RUNWAY

INFRASTRUCTURE: ₹10,000

WHAT WE ARE BUYING	WHERE WE BUY (VENDOR)	PURPOSE & TECHNICAL REASON	ALLOCATED COST
Virtual Number & SIP Trunk Telephony Carrier Route	Plivo.com / Twilio	Dedicated virtual phone number for outbound calling and inbound call handling, plus initial call-minute carrier balance (~2,500+ mins).	₹2,500
Real-Time Speech-to-Text Streaming Audio Transcriber	Deepgram Nova-2	Converts caller speech into text in under 150ms with deep accent recognition and acoustic noise filtering. Pre-funded for ~3,000+ mins.	₹2,000
LLM Intelligence Engine Conversation Reasoning Brain	OpenAI / Groq	High-speed conversational reasoning using GPT-4o-mini / Llama-3.3-70B. Pre-loaded token balance (~150,000+ dialog turns).	₹2,000
Voice Synthesis (TTS) Human-like Voice Engine	Cartesia / ElevenLabs	Low-latency neural voice synthesis producing natural human cadence, breathing, and friendly tone. Covers ~2,000 mins of voice generation.	₹2,000
Dedicated Cloud VPS 2 vCPU, 4GB RAM Runtime	Hetzner / AWS / DO	High-uptime cloud server hosting the live WebSocket gateway, database, webhook listener, and task queue. Includes 3 months hosting.	₹1,200
Domain, SSL & Security Enterprise DDoS & WSS	Cloudflare / Namecheap	Custom domain endpoint routing with end-to-end SSL encryption for ultra-secure WebSockets ('wss://') and edge acceleration.	₹300
TOTAL INFRASTRUCTURE, TELEPHONY & API RUNWAY CREDITS			₹10,000

3 PRODUCTION SYSTEM ARCHITECTURE PIPELINE

4 POST-LAUNCH OPERATING COST PER CALL MINUTE (POST RUNWAY)

Transparent Unit Economics: Once the initial ₹10,000 credit package is utilized, the ongoing operational cost is purely pay-as-you-go based on exact usage:

SERVICE LAYER	PROVIDER	BILLING MODEL	COST / MINUTE (INR)
Telephony Outbound Minutes	Plivo / Twilio	Per second / min connected	₹0.60 - ₹0.90 / min
Real-Time Speech-to-Text (STT)	Deepgram Nova-2	Per second of streaming audio	₹0.35 / min
Language Model Intelligence (LLM)	OpenAI GPT-4o-mini	Per 1K input/output tokens	₹0.18 - ₹0.25 / min
Human-like Voice Synthesis (TTS)	Cartesia Sonic	Per character generated	₹0.40 - ₹0.60 / min
ESTIMATED TOTAL COMBINED OPERATING COST PER CALL MINUTE			~₹1.60 - ₹2.20 / min

5 KEY CAPABILITIES & FEATURES INCLUDED IN SCOPE

✓ Smart Barge-In & Interruption AI instantly pauses speaking the millisecond a human interrupts.	✓ Automated Lead Qualification Extracts client interest, budget, timeline, and booking details.
✓ Live Call Transfer to Human Agent Warm transfers high-value callers to sales team when requested.	✓ Automated Transcripts & CRM Push Full transcript, audio recording, and summary sent via webhook.

6 IMPLEMENTATION TIMELINE (7 TO 8 DAYS TO PRODUCTION)

DAYS 1 - 2 Provisioning Plivo number setup, API keys, and VPS cloud configuration.	DAYS 3 - 4 Core Engine Prompt scripts, objection handling, and voice persona tuning.	DAYS 5 - 6 Integration WebSocket bridge, telephony hooks, and Supabase CRM link.	DAYS 7 - 8 QA & Go-Live Latency optimization, end-to-end testing, and production deployment.

7 COMMERCIAL TERMS, HANDOVER & ACCEPTANCE

• Payment Schedule: 40% Advance Kickoff (₹14,000) • 40% Working Voice Demo (₹14,000) • 20% Production Handover (₹7,000). • 100% Client Ownership: Full Git source code repository and direct account ownership of Plivo, OpenAI, Deepgram, and Cloud VPS. • Warranty & Support: 30 days of post-deployment monitoring, bug fixes, and prompt refinements included at zero additional cost.
